

Sanjai Kumar M

Full Stack Developer

sanjaikumar260301@gmail.com | LinkedIn | GitHub

Objective

Full Stack Developer with 1+ year of experience in React.js, Angular, Node.js, and .NET Core. Skilled in building scalable web applications with responsive front-end interfaces and efficient back-end systems. Looking to contribute to innovative projects in a dynamic organization.

Skills

Frontend: React.js, Angular, HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, .NET Core, REST APIs

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, Figma, Postman

Work Experience

Junior Full-Stack Developer | POBO Technologies, Tiruchirappalli - Nov 2024 - Present

- Developed scalable web applications using **Angular, React, Node.js, .NET Core, and MongoDB**.
- Worked in **Agile methodology** with tools like **Azure DevOps and Jira** for sprint planning and tracking.
- Integrated **payment gateways** and **secure file storage modules**, enhancing application functionality.
- Collaborated with cross-functional teams to deliver projects within deadlines and improve overall code quality.

Full Stack Internship | WHY Global Services, Chennai - Jan 2024 - June 2024

- Built **React.js components** for real-time projects, improving front-end responsiveness
- Designed and implemented **RESTful APIs** with **Node.js and MongoDB**, ensuring reliable data storage and retrieval.
- Gained hands-on experience in **HTML, CSS, JavaScript, React.js, Node.js, and MongoDB**.
- Contributed to the development of **E-commerce and Crowdfunding applications**, enhancing user experience and system performance.

Project

Doctor Appointment Application

Developed a full-stack online doctor appointment system using AngularJS, Node.js, Express.js, and MongoDB. The application allows patients to seamlessly book appointments while enabling doctors to manage their schedules. A secure authentication system was implemented for both patients and doctors, along with real-time notification features to remind users of upcoming appointments. The backend was optimized with Express.js and MongoDB to ensure efficient data management and retrieval.

Food Delivery Application

Designed and developed a real-time food ordering platform with AngularJS, Node.js, Express.js, and MongoDB. The application provides secure user authentication and an intuitive front-end for browsing menus, placing orders, and tracking deliveries. RESTful APIs were built to handle order workflows and real-time updates, while the user interface was optimized for responsiveness to ensure a smooth experience across devices.

Parking Management System

Created a scalable parking management system leveraging AngularJS, Node.js, Express.js, and MongoDB. The solution featured real-time spot availability, automated reservation handling, and secure digital payment integration. A responsive and user-friendly interface was designed for both mobile and desktop users, while efficient database management improved data retrieval and reduced parking search times by 30%, resulting in greater user satisfaction and operational efficiency.

CAL ONE – Hospital Management and Doctor Appointment System

Built a comprehensive hospital management and doctor appointment system using React, .NET Core, and PostgreSQL. The application allows patients to register hospitals and book doctor appointments while providing hospitals with tools to manage doctors, schedules, and patient records. The system integrates secure authentication, hospital registration workflows, and appointment tracking features. A robust backend powered by .NET Core and PostgreSQL ensures secure data handling, while the React-based front-end delivers an intuitive and responsive interface for patients, doctors, and administrators.

Education

M.Sc. Computer Science | National College Trichy (2021-2023) 69%

B.Sc . Computer Science | National College Trichy (2018-2021) 63%

Certifications

Full Stack Development | MREN | 2024
